

## WIRELESS OPTICAL MOUSE

### SERIES T100

### Touch mouse with ergonomic design: as good as it gets!

This Wireless Optical Touch Mouse from Phoenix Technologies is a touch mouse that allows you to navigate freely with the swipe of a finger. It employs a wireless tiny-receiver that's small enough to plug in and leave connected to your computer, and which conveniently stores inside the mouse. The ergonomic design enhances comfort for both left and right-handed users. Browsing the Internet was never this easy!

#### Product's highlights:

- Easily navigate your mouse pointer with the swipe of your finger
- Left or right handed use
- 2.4 GHz wireless technology for long-range connectivity with reduced interference
- Nano receiver conveniently stores inside of the mouse
- Powered by two (2) AA batteries
- Compatible with Windows 10, 8, 7, Vista, XP operating systems and Mac OS
- Glossy piano-black finish and ergonomic design
